

EBC 2009 - BERLIN

Friday		Investigator and company meetings (Hotel)	
11:00-13:00	Hotel	Investigator meeting Blast (Volcano)	
11:00-13:00	Hotel	Capella meeting	
13:00-14:00	Hotel	Comittee meeting for EBC study	David Hildick Smith
14:00-15:00	Cinema	Abbott Pre-Meeting	
10:00-15:00		Pie medical hands on workshop Medis software hands on workshop Cordis bench testing and virtual reality	
		Welcome drink (Hotel)	
15:30		Hot news	Chair: Lefèvre Panel: Albiero , De Winter, Buchbinder
10+3		Lessons from DK crush studies	Chen
8+2		Balloon specifically designed for the POT technique	Darremont
10+3		Stent thrombosis in bifurcation and left main disease, insight from J Cypher	Kimura
10+3		News from asian bifurcation club	Murasato
10+3		Stent fracture in bifurcation lesions	Kinoshita
10+3		Bifurcation stenting expertise by simulation ?	Mortier
8+2		Should we use 2 non compliant balloons for FKS	Hovasse
8+2		Balloon inflation time for kissing: 5 seconds of inflation is not enough	Hikichi
8+2		Bifurcation stenting in AMI with self expendable stent ?	Van Geuns
		Hot controversy	
8		Crush technique; died aged 6, 2008"	Hildick-Smith
8		No! The Crush technique is still alive	Galassi
4		Discussion	
17:50	Break		
18:10		Ongoing EBC projects	Hildick-Smith / Louvard
18:20		Why I like this dedicated stent, device, software ...	Chair: Hildick Smith Panel: Kornowski, Di Mario, Zelisko

8+2	Petal	Ormiston
8+2	Medtronic stent	Meredith
8+2	Sideguard	Chieffo
8+2	Minvasys	Fajadet
8+2	Stentys	Verheye
8+2	Antares	Hoffmann
8+2	Tryton	Bartorelli
8+2	Devax	Dubois
8+2	Pie medical	Serruys
8+2	Medis	Reiber

20:00 Break Cocktail

20:30-22:00 Case review session

Chair: Darremont and Lassen
Panel: Steigen, Carrié, Chieffo

SATURDAY EBC SYMPO

08:00 BREAKING THE CONSENSUS Opening

08:10 Bifurcation lesion and treatment definition
Chair: Lassen Panel: Thuesen, Medina, Verheye
10 SB diameter as an index of MI Kassab

10 Biomarkers: only endpoints for studies or predictors of futur events ? Popma
10 Should we modify the medina classification ? Buchbinder
10 Do we need an EBC e-CRF ? Hildick Smith
20 Discussion, new consensus or suggested study VOTING SYSTEM

09:10 Atheroma on the carena or not ?
Chair: Stankovic Panel: Kassab, Legrand, Erglis
10 No atheroma on the carena: anatomo pathology Finn

10 "No ! carena is not always free of disease ! is it important or not ? Medina
10 Different / evolving anatomies: different atheroma ? ?????

Discussion, new consensus or suggested study

Coffee break

Simple or very simple technique for most bifurcation lesion ?

- 3D OCT analysis of stent struts in front of a SB
- Leaving stent struts in front of SB is not good ?
- Distorsion of stent when dilating toward the SB: always ?
- Better clinical follow up with final kissing
- No clinical consequence of stenting across ?
- Insight from Corpal Kiss
- Insight from Nordic III
- Final kissing balloon inflation is a factor of complication
- How can we explain bad results after FKS ?

Discussion, new consensus or suggested study

Lunch

Is respect of coronary branching laws important ?

- Yes: three segments = 3 diameters and flow divider at its right place
- Better results when the Murray's law is respected ?
- Branching laws can be changed by stenting without consequences

Discussion, new consensus or suggested study

Complex techniques for complex lesions ?

- What are the situations where we need a double stenting ?
- Complex techniques in complex lesions : which one is the best ?

VOTING SYSTEM

Chair: Louvard Panel: Brunel, Bonan, Sheiban

Serruys

Dubini

Mortier

Burzotta

Park

Pan

Lassen

Gwon

Murasato

VOTING SYSTEM

Chair: Albiero Panel: Van der Giessen, Dzavik, Dubini

Kassab

Koo

Kim

VOTING SYSTEM

Chair: Stankovic Panel: Fajadet, Galassi, Chen

Sheiban

Thuesen

17:50
18:00

Why not using provisional strategy even when systematically stenting the SB ?
Discussion, new consensus or suggested study

Stent thrombosis and bifurcation stenting ?

Bifurcation stenting is a predictive factor of stent thrombosis

Complex and simple techniques: the same risk ?

Reasons for increased risk: flow ?

Discussion, new consensus: rules for stent thrombosis comparisons

Lefèvre
VOTING SYSTEM

Chair: Pan Panel: Kimura, Erglis,
Lesiak

De la Torre-Hernández

Hildick Smith

Chatzisis

VOTING SYSTEM

Coffee break

Bifurcation angles: influence on bifurcation stenting indication

B angle as a factor of events

Is Left main angulation really a predictor of mortality for Left Main ?

Which techniques have to be avoided for wide angle bifurcations

Why ? : from bench point of view

Why ? : from simulation point of view

Discussion, new consensus or suggested study

Chair: Ferenc Panel: Gil, Ludwig,
Dudek

Dzavik

Girasis

Adrienssens

Ormiston

Wentzel / Dubini

VOTING SYSTEM

What we have learned during this 2 days ?

CONCLUSION

Stankovic

Louvard
